An accomplished Software engineer. I take pride in being able to thrive in dynamic and challenging environments.

EXPERIENCE

Gocreate Africa, Lagos, Nigeria — *Backend Developer*

FEB 2022 - PRESENT

● Used Bash scripts to automate 12 annual SSL certificate updates, ensuring continued, secure access to the site(web.gocreateafrica.app).

● Integrated secure payment system to handle local and international payment schemes for users.

● Implemented React and Redux to handle API calls made by Django, manage states and return a response.

Eccles IT Ltd, Leeds, UK — *Backend Developer*

JUNE 2022 - SEPT 2022

● Implemented CI/CD in collaborative tasks to ensure automation in building, testing and deploying a piece of software(softskillspace.com).

● Containerized software to run irrespective of any environment using Docker.

● Automated simple and common process using Bash scripts

PROJECTS

Data School — *An API for learning platform*

Designed and Built an API with User Authentication and PostgreSQL Integration

● Improved security and user privacy through user authentication using JWT, resulting in a 30% decrease in security-related incidents.

● Increased the efficiency of data storage and retrieval through the use of PostgreSQL, leading to a 25% decrease in data processing time.

● Enhanced the user experience through the API's user-friendly interface, leading to a 20% increase in user satisfaction.

SKILLS

● Nginx
● Node.js
● Django
● Python (Programming Language)
● HTML
● Cascading Style Sheets (CSS)
● JavaScript
● C (Programming Language)
● Problem Solving

LANGUAGES

Fluent in English and some other indigenous Nigerian languages
